

ORBEA

Created with you, made for you

We're not made to follow the same story.
Freedom is part of why we all ride, so why
shouldn't it extend to the bike you choose?
Customisation is not just about how it looks, but
how it rides, how it fits and how it feels.

A design that feels truly yours makes you look
forward to every ride, because the bike you've
created already reflects your style and your way
of understanding cycling. It's an exclusive
design, made to accompany you and respond
to what you need on every ride.

MYORBEA
CUSTOM

Pure Essence

Performance becomes an obsession you feel in your body and soul. Feather-light and lightning-quick, Alma is packed with technology to let you take it further and faster.

Created together, made for you

X-Fader

Acting as a micro damper, the seat tube design provides more vertical compliance, fading away vibrations and impacts, providing comfort, control and reducing fatigue.

Advanced Alloy

Using aluminum technologies as advanced as our carbon manufacturing ensures our aluminum bikes are never second-best. For riders who prefer alloy, this is simply the best frame you can buy.

110mm Fork

Alma's geometry is designed to work with a 110mm fork, hitting the sweet spot of bump-absorption and low weight.
